EXPERIENCE

FREELANCE FULL-STACK DEVELOPER

5C Mentorship Platform & Meweda Matrimonial Site | Present

- Architecting and developing responsive web applications for mentorship tracking and matrimonial matchmaking.
- Implementing robust REST APIs, secure authentication, dynamic profile management, and real-time messaging.

SOFTWARE ENGINEERING INTERN

WeTech PLC – Das Homes Call Center Project | 2026

- Built internal tracking tools and data workflows for call center tracking and property photoshoot scheduling.
- Engineered streamlined UI modules to enhance lead management pipelines and overall operational efficiency.

WEB DEVELOPER INTERN

Tofi Tech Solutions | June 2024 – November 2024

- Participated in the full SDLC from requirement gathering to frontend/backend web deployment.
- Conducted code reviews, refactored components, and optimized user interfaces for client applications.

KEY PROJECTS

DRIVER'S LICENSE RENEWAL SYSTEM

School Final Capstone Project | 2026

- Centralized web portal automating license renewal workflows for citizens and administrative personnel.
- Engineered digital registration forms, document verification, and appointment scheduling pipelines.

UNIMATE – CAMPUS MANAGEMENT APP

Cross-Platform Mobile Project | June 2025 – August 2025

- Developed a Flutter + Node.js + Firebase app for schedule management and real-time push alerts.
- Integrated automated QR code attendance tracking and digital student ID cards.

INVENTORY MANAGEMENT SYSTEM

Full-Stack Web Project | 2021 – 2025

- Engineered an inventory and point-of-sale platform handling retail transactions and staff payroll.

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

University of Technology and Innovation | Expected: September 2026

- Transferred from Hawassa University (June 2021 – January 2022).
- Focus: Software Engineering, Distributed Databases, Web/Mobile Architectures, and UI/UX.

SKILLS

React.js	**Node.js**
JavaScript	**Flutter / Dart**
HTML5 / CSS3	**Express.js**
MySQL	**MongoDB**
Firebase	**REST APIs**
UI/UX Design	**Agile / Scrum**

TECHNOLOGIES

- Agency Management System
- Full-Stack Web Architectures
- Mobile App Frameworks
- Relational & NoSQL DBs
- Git & GitHub Version Control
- Cloud BaaS (Firebase Realtime)
- API Design & Integration

COMPETENCIES

- Full SDLC Execution
- UI/UX Prototyping
- Cross-Functional Teamwork
- Clean Code & Refactoring
- Technical Problem Solving
- Performance Optimization

PROFILE HIGHLIGHT

- Available for Full-Stack, Web & Mobile engineering opportunities.
- Active GitHub portfolio & production deployments.
